

APEX Seminar Series

Professor Willie Hamilton and Dr Raff Calitri

Primary Care Diagnostics, University of Exeter Medical School

Cancer diagnostic trials in primary care - ECASS and ERICA

Britain still lags behind the rest of Europe in cancer survival. Much of this is blamed on diagnostic delays, with estimates of lives lost from this ranging from 5000 to 10000 every year. There are now several 'tools' available to assist GPs in spotting those with 'possible' cancer. Willie and Raff will report on a large feasibility trial on oesophago-gastric cancer (ECASS) and an upcoming trial of six common UK cancers (ERICA).

31 October 2018

Time: 13.00-14.00

Venue: Room JS07, Smeall Building, St Luke's Campus

Join us afterwards for our informal monthly APEX meeting: updates on progress in APEX and networking (refreshments will be served)

Email: j.l.Choules@exeter.ac.uk to book your place
