

Dr Joanne Reeve

Associate Clinical Professor in General Practice,
Warwick Medical School

“OPTICare – Applying a science of generalism to tackling problematic polypharmacy”

Problematic polypharmacy occurs when individuals taking several long-term medicines experience more disruption from their tablets than benefit. PenCLAHRC is tackling this as a priority area of work resulting in the development of OPTICare. Joanne will introduce the work being done by their team of clinicians, academics and patients to apply the science of generalism to developing a new model of individually tailored prescribing.

Date: 20 April 2016 plus videoconferencing to Knowledge Spa

Time: 13:00-14:00

Venue: Room JS07, Smeall Building, St Luke's Campus

Join us afterwards for our informal monthly APEX meeting: updates on progress in APEX and networking (refreshments will be served).

Email: j.l.choules@exeter.ac.uk to book your place.
