

Optimising Interventional Treatment of Tennis Elbow

Jonathan Evans MRCS

Bio

Mr Jonathan Evans MBChB, BSc (Hons), MSc, MRCS is an Orthopaedic Registrar on the South West Peninsula rotation. Having graduated from Bristol University in 2007 he has fostered a research interest allied to his surgical training, predominantly focused on sports medicine and upper limb pathology. In 2016, he commenced a 2-year MD research programme at Exeter University. His research focus relates to the optimisation of treatment in tennis elbow through the systematic evaluation of current outcome use and validity, and the assessment of novel injection techniques using feasibility RCT, Delphi consensus study and cadaveric assessment methodologies.
