Falls Search Summary, completed 15<sup>th</sup> Mar 2016

PenCLAHRC & PenTAG

downloaded										
No. database searches carried out = 6										
Total no. refs found from searching = 2722										
No. refs screened at Ti&Ab =										
No. of included refs from searching = 7										
Total no. of included refs = 17										

x = found from the search

\*\* = We do not have the information to know what method of supplementary searching led to the additional 3 refs so the methods of supplementary searching are listed but the numbers are listed in Suppl. Searches (all)

## **Results**

*Table 1*

- This was an update review so the same search strategy and search were carried out
- 3 papers were picked up from supplementary searching
- We do not have access to all the files to fully complete the table and table 2
- No database provided unique results
- The Cochrane search did not pick any included references
- Searching either Embase or CINAHL would have picked all the included results from searching
